# Computational Approaches to Questioned Handwriting Examination

Sargur (Hari) Srihari  
University at Buffalo  
State University of New York

# Computational Forensics

---

- Forensic domains involving pattern matching
- Motivated by Importance of Quantitative methods in the Forensic Sciences
  1. Daubert Ruling
  2. High Standards established by DNA
  3. Computers
    1. Low Cost
    2. Advances in Artificial Intelligence/Pattern Recognition
  4. Improved Statistical Methods for Evidence

E.g., Aitken and Taroni, *Statistics and the Evaluation of Evidence for Forensic Scientists*, Wiley, 2004

# QDE

- Bureau of Justice Statistics (2002)
  - Among 50 largest publicly funded crime labs
    - 57% perform QD function
    - 5,231 cases requested
    - 1,079 backlogged at year end
- Significantly larger case load internationally
- Handwriting is common in QD case work

Complaint for the summer.  
Not be back June 27 - July 4  
for the Royal Miss Nationals. It  
would be great to see you there,  
if you'd like to join us. We'll  
be staying at the Bayview Hotel  
Hilton is here now - where the sub  
takes place.  
Mary Banks again. Love  
to see you in the fall at least  
if not sooner!  
P.S. send me a  
pic when you  
back!  
Trudly,  
Patricia  
Graham

# CEDAR Research on Handwritten QDE

---

- Research on quantifying discriminatory power of handwriting since 1999
  - Testing on national database, twins data
- Feedback from QDE's in developing computational tools

Known

Nov. 10, 1999

From  
Jim Elder  
829 Loop Street, Apt. 300  
Allentown, New York 14707

To  
Dr. Bob Grant  
602 Queensberry Parkway  
Omar, West Virginia 25638

We were referred to you by Xena Cohen at the University Medical Center. This is regarding my friend, Kate Zack. It all started around six months ago while attending the "Rubey" Jazz Concert. Organizing such an event is no picnic, and as President of the Alumni Association, a co-sponsor of the event, Kate was overworked. But she enjoyed her job, and did what was required of her with great zeal and enthusiasm.

However, the extra hours affected her health; halfway through the show she passed out. We rushed her to the hospital, and several questions, x-rays and blood tests later, were told it was just exhaustion. Kate's been in very bad health since. Could you kindly take a look at the results and give us your opinion?

Thank You!

Jim

**Feature Comparison Table**

**Strength of Evidence**

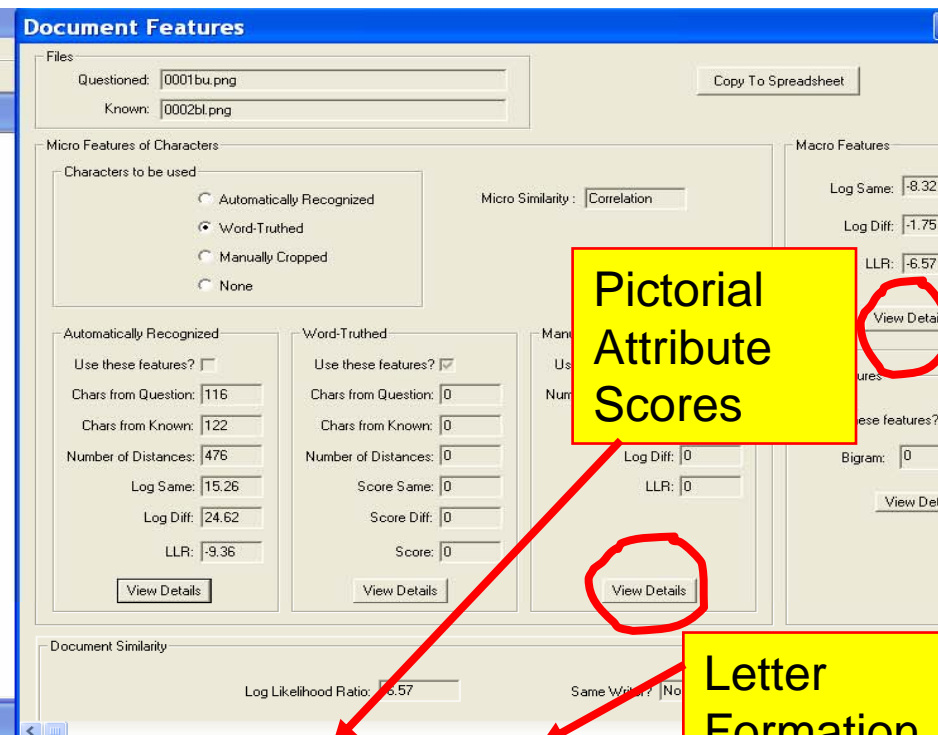

# How is Strength of Evidence Computed?

---

- Handwriting characteristics are extracted from both K and Q and their similarities compared to the similarities in a representative database
- Based on a data base of 1,500 writers providing 3 pages of writing each
- Probability distributions of similarities modeled by Gamma and Gaussian distributions

# What Handwriting Characteristics are Computed?

However, the extra hours affected her health; walking through the show she passed out. We rushed her to the hospital, and several questions, x-rays and blood tests later, were told it was just exhaustion.

Kate's been in very bad health since. Could you kindly take a look at the results and give us your opinion?

# Writer Identification

The image shows a screenshot of the CEDAR-FOX software interface. The main window displays a handwritten document titled "0001au.png -- Questioned Document". The document is a letter dated "Nov 10, 1999" from "Jim Elder" to "Dr. Bob Ghent". The letter content discusses a referral by Xena Cohen and a jazz concert. A red circle highlights the "ID" button in the toolbar. A yellow box labeled "Ranked Document List" with a red arrow points to the "Identification results" window. This window contains a table of document scores.

**Ranked Document List**

Documents	Scores

# Word Recognition

The image shows a screenshot of the CEDAR-FOX software interface. The main window displays two panels. The top panel, titled "0002bl.png-- Known (Segmented)", shows a handwritten text sample with words segmented and color-coded. The bottom panel, titled "0001al.png-- Questioned", shows the same handwritten text sample without segmentation. A red circle highlights the "WR" button in the toolbar. A yellow box labeled "Lexicon Selection" with a red arrow points to the "Open" dialog box in the bottom right corner. The dialog box shows a file list with the following items:

- sig folder
- batch.txt
- Cedar\_letter\_lexicon.txt
- Cedar\_letter\_lower.txt
- Cedar\_letter\_upper.txt
- Fox\_lexicon.txt
- most300.txt

The "File name:" field is empty, and the "Files of type:" dropdown is set to "Text Files (\*.txt)".

Prof. Woodman,

I'm very glad to get your letter about my research work. Thank you for your kind comments. I will carefully re-do the experiments related to the most concerned parts for image features from using gray level and 3-D constructions for both feature analysis and visualization.

In January 16 I will attend a conference in San Jose, CA. I hope I will have time to visit you then we can discuss the problems we are both interested in. The Hough theorem in the L-conver space is especially interesting to me. If the generalization holds, there will be many real applications in my area of research. Please let me know if you will be available during 16th to 23rd. My cell phone number is 716-123-4567.

Have a great winter!

Regards

Zhiyi

# User Manual

Available  
In Help  
Menu

Organized by Topics  
Hierarchically

# Summary

---

- CEDAR-FOX is a system for QDE with a focus on handwriting
- Has automated tools for writer/signature verification/identification
- Has tools for case-work display
- Computes strength of evidence

# Future Work

---

- Better Statistical Model
  - Current statistical model in system uses independence assumption
  - Performance is not high as with better theoretical models, e.g., neural networks
  - Plan to incorporate a compromise model e.g., pairwise independence

# Future Work: Line Segmentation

We were referred to you by Xena Cohen at the university Medical Center. This is regarding my friend, Kate Zalk.

It all started six months ago when attending the "Kubeg" concert. Organizing such an event is no picnic, and as president of the alumni association, a co-sponsor of the event, it was overwhelming. But she enjoyed her job and did what was required of her with great spirit and enthusiasm.

However, the extra hours affected her health; halfway through the show she passed out. We rushed her to the hospital, and several questions, X-ray blood tests later, were told it was just exhaustion.

Kate's been in very bad health since. Could you take a look at the result and give us your opinion?

Thank you!
